

The Challenge

On this page students will find a more challenging vector design. Students are to re create the design by using the pen tool, colour fills and strokes, with a colour palette of their choosing. Be sure to change the line profile for your stroke to a more suited style. Make a new layer for each part of the design.

When creating a design in ADOBE ILLUSTRATOR always work from back to front. Meaning that each object in the design is on its own layer.
